Could it be a scam?

Well, there is actually one straightforward way to find this out for a digital product: what's the refund rate? Products with a high refund rate are sometimes a scam. What are the bonuses available? (and just what is a bonus?)

Certain sites have taken to offering what's known as a 'purchase bonus'. It's a bit like a free softdrink when you buy a burger - a thankyou your buying via their link. In the example of F A S T Roulette System, you can find a bonus on offer that is a guide describing ways to get access to a huge selection of hidden bonuses - you simply need a clever (and secret) Google search to find them. (See link at the bottom of the article)
