UFC 120 Gambling Competition Marks Lengthy Journey In MMA Development

For young fanatics of MMA it might be impossible to imagine, but there was a time when MMA and the UFC were outcasts. The sport started underground in the US, having been introduced from Japan and Brazil where this kind of battle has been popular for decades, and gradually morphed into a raw and embryonic UFC - a far cry from what you are going to see at the UFC 120 odds competition.

In those days there was no filling up stadiums, or holding the events overseas, as with the UFC 120 betting competition in London. Back then the promoters were pleased just to have the seats full and even picked smaller-sized venues so that there wouldn't be empty seats on film.

And at that time - again, a very long way away from the global buzz and demand for the UFC 120 lines event - there was no pay-per-view, no advertising and minimal promotion. If you had to see the event you had to buy or borrow the VHS video tape.

Yes, that's right, no pay-per-view and no DVDs or Spike TV. You had head over to the closest video rental store and ask the clerk if they had, or were planning to get, the UFC video tape.

Fighters like Royce Gracie, Dan Severen and others were the first innovators of the UFC tournaments in what seems like a entirely different sport than what we will in the UFC 120 lines competition. These men were basically fighting for peanuts and a little pride while today's UFC athletes are millionaires and worldwide stars.

But there is no question that the sport has evolved for the better. The fighters are superior, there's more expertise in the tournament pools and, best of all, UFC has exploded into a worldwide sensation at the [sports book](#) that showcases the top fighters on earth.

The UFC got its beginning back in the early 90s when Rorion Gracie, Art Davie and John Milius put together a championship showcasing no-holds-barred battle with fighters from several different backgrounds. They planned to turn the event into a television franchise and got together a bunch of investors and enlisted the help of the Semaphore Entertainment Group to air the 1st competition.

The 1st UFC competition, UFC 1, was put on at McNichols Sports Arena in Denver Colorado on November 12, 1993. It highlighted fighters with backgrounds in kickboxing, savate, boxing, karate, sumo wrestling and Brazilian Jiu-Jitsu. In fact, Rorion's younger brother, Royce Gracie, was in that 1st tournament after being specially picked by Rorion to stand for his family and the Gracie Jiu-Jitsu style in the forthcoming event. UFC 1 was thought to be a accomplishment when it drew almost 87,000 subscribers on pay-per-view. The UFC sought to answer queries like "Could a wrestler defeat a boxer?"

Even though the UFC ran with the tagline "There are no rules!" at first, they in fact did have a couple of rules. No biting or eye-gouging, and you weren't truly supposed to (but could in any case) use methods like hair-pulling, headbutting, groin strikes and fish-hooking. Things have evolved with the establishment of tighter rules since that

time, but the UFC continues to be among the most open kinds of battle that a contender can engage in.

When the UFC 120 [online sports wagering](#) action at last gets moving buffs ought to sit back and value what they've got.
