5 Simple Steps To Placing

Hi! It's me again on the [golf clubs review](#) . We have one quick question with regard to ya... how is your golf game? Well most golfers would agree that the main part of your golf game is putting. It seems that unless you understand the principles guiding it, you can really screw up your score.

To progress, I've come up with 5 tips to assist you strengthen your putting video game.

1. You've got yourself to near or on the green. Its time to begin with thinking about the putt. As you approach check out the land around the green. This will give you the right reference points when trying to figure out the line of your putt. What is the final slope of the green? Are there any features for example water nearby - greens tend to slope off into that direction of water.
2. Take your time!! Learn that putt! It's very important to be able to study the lay and just remember to take extra care and appearance for cheeky breaks there.
3. Grip the club lightly. Just enough like holding an egg. Too much, and you'll be too tense to get off a good set. Too little and you'll have no control. Make sure that you favor the right arm with regard to grip pressure. This guides your putter. (If you are right handed.)
4. Stand so that your eyes are directly in the golf ball. Be comfortable and balanced inside your stance. The golf ball needs to be toward your front high heel. If it's too far back then your putting stroke is going to be too steep - this often ends up with a mis-hit.
5. Finally, you need to create a triangle with your hands and shoulders. Now, just remember to are swinging like any pendulum. This will grant you a smooth stike at the golf ball.
