A huge perk that a Bermuda vacation brings is the ability to utilize a passport card instead of a passport book. The card is much cheaper than the book, but it has a few restrictions. For one, you can only travel to Bermuda, Mexico, Canada, and the Caribbean, and you can only travel by land or sea. If you decide to take a plane, then you will need a passport book. Going online can get the book or card for you, as well as a handful of other services, like getting expedited lost US passport replacement service, additional pages for your passport, and so on.

One very important location is Town of St. George. It is an official UNESCO World Heritage Site as well as the oldest inhabited British colony in the New World, having been founded in 1612. It is a popular stop for vacationers, as features colonial architecture, winding cobblestone streets, pretty little parks, and a lot more, making it a great place to explore after a day at the beach. While you're there, you'll definitely want to explore King's Square, the original public square of Bermuda. In addition, St. George is home to several very important buildings, including churches, museums, old houses, and the Town Hall.

A large part of anyone's trip to Bermuda involves the water. Activities like scuba diving and snorkeling, swimming, boating, and fishing are top notch here, and there certainly is no shortage of places to do them. Horseshoe Beach, easily the most popular beach in Bermuda, is one of them. Famous for its signature powdery pink sand, water that's as clear as glass, beautiful coves and caves, and the paradise atmosphere, it's an absolutely stunning location. For exploring the deeper water, there are plenty of dive and snorkeling companies. They can take you to explore shipwrecks, vibrant coral reefs, and more.

Bermuda is not only spectacularly beautiful, but it's very fascinating, thanks to its long historical record. There are around a hundred forts on the chain of islands, each with its history. There are also plenty of museums to check out, with one of the best being the Bermuda Aquarium, Natural History Museum, and Zoo. In this all-in-one museum, you'll find the first living coral reef exhibit in the world: a 140,000 gallon tank full of a living replicated coral reef environment. The museum also features over 200 species of fish, as well as turtles, seals, lots of birds, and more.

While there are plenty of attractions in Bermuda, be sure to pause and simply enjoy its natural beauty. Perhaps you should avoid straying into the Bermuda Triangle, but many can attest to the beautiful dive spots there, so it might be worth it. Just remember that you'll need a USA Passport card or passport book. If you've misplaced your passport, you can also get [expedited lost American passport](#) replacement online.
