Blue Fishing On Long Island

What are blue fish?

Bluefish are a migratory fish that live inside the Atlantic Ocean from Nova Scotia to Florida. Bluefish get their name from the bright bluish tint found on the sides of their body. Bluefish migrate north as the ocean water temperature increases and are abundant off New York shores from May possibly through November. High quality locally harvested bluefish are widely accessible in New York markets and can be caught on [Long Island Party Boats](#) throughout the summer and fall, and bluefish harvested inside the southern Atlantic states is accessible in New York markets throughout the colder months of the year.

When to go fluke fishing:

June-mid October

How do you catch blue fish?

Diving birds are a positive sign you can find Bluefish inside the area. Cast a diamond jig or plug into a pack of operating birds and your virtually positive to get a Bluefish. Chumming from an anchored boat will be the most well-known way to fish for Blues. Spend out Bunker chum to attract fish even though dropping back pieces of cut bunker on your hook. Trolling tubes, jigs , bunker spoons, plugs or umbrella rigs work excellent. This strategy is extremely efficient for locating fish. Some sharpies will troll to locate the fish after which anchor or drift inside the area for with bait. So that you can maintain your trolling lures down in the correct depth it is generally needed to troll with heavy drail sinkers or wire line. Wire line trolling will be the most efficient. Some sharpies also use down riggers. Jigging for blues functions nicely when there is certainly a significant body of fish concentrated in an area . Diamond jigs tipped with surgical tubes are dropped towards the bottom and reeled up quickly. They are able to often be bounced off the bottom too.

Are blue fish friendly?

May possibly be essentially the most voracious predator inside the Bay. A bluefish will kill another fish just for the sake of killing, even after it has eaten its fill. Bluefish have also been recognized to bite human bathers at beaches when they wander too close to a school of fish becoming hunted.
