## [f50.6](#)

In 1920, Adi Dassler made his first pair of shoes not the [f50 Soccer Shoes](#) from the actual measely materials which were obtainable after World War I, and the Adidas Organization has right now been producing top quality sporting gear as well as style in excess of 80 years. Included in that fashion and sports gear mix has always been athletic footwear made with the latest and most advanced technology. The company prides itself on designing shoes that work with your feet, and not making your feet conform to the shoes. When your shoes and feet work comfortably together, it helps you to excel in your performance, whether you are a professional athlete or a weekend warrior.

For decades, Adidas has created innovative [products](#) for all fitness enthusiasts and athletes. The footwear, accessories, and apparel have become stars, not unlike some of those who have worn them. The items raise newbies, newbies, experts and all-stars to greater levels of overall performance, simply because Adidas is equally as passionate about the things theyre doing as they are.

[f50 soccer shoes](#) are the latest and most innovative soccer product from the Adidas company. They have proved extremely popular because they are super lightweight but with lots of support. Athletes around the world are wearing the f50 because of the creative features and comfort of the shoes. Instead of heavy and bulky cleats, most of the f50 varieties weigh in at ten ounces or less. They also have an area on the upper, on the inside of the foot, which has some traction material to aid in kicking.

Some of the shoes in the line weigh in at less than six ounces, like the f50 adiZero(TM) TRX FG cleat shoe that is ultra lightweight to give athletes top speeds. Many of the shoes in the line, including this one, also feature the specialty synthetic upper that Adidas has named Sprintskin. Some also have the new TRAXION(TM) FG outsole which gives you great comfort and excellent grip on firm natural surfaces. Adidas says that the sprint frame is what keeps the shoe so light while also delivering excellent support and stability.

The sprintskin synthetic uppers are thin but strong so that you can really feel the ball. The bottom frames are made to reinforce the uppers and to prevent abrasion. They are also available with quilted ULT K glove soft leather for a soft and perfect fit. The football boots comes with two sets of ultralight sockliners, which are removable and interchangeable. The shoes also feature support bands which increase support and stability when you make medial or lateral moves. Additionally, there is a Velcro fastened lace cover so you can tie them and forget them.
