Free Poker Online Games Reviews The Most Popular Poker Game Free Downloads For Pc

In this article we're reviewing [poker free online games](#) and asking to what extent are, or can such games be as training aids for real online poker play against real people for money.

To clarify, what we are reviewing are download poker games you play by yourself against the computer rather than the kind of free poker game downloads you're able to play at most poker online websites that feature free practice game play against other beginners or people testing tactics.

Our evaluation focuses on the most well known title around, namely the Governor of poker games collection and the links are to parts 1 and 2, suitable for both pc and mac downloads..

Truly free?

Each game is \$6.99 however, you can try free before you buy since they give you a poker games download free complete edition test for pc and Mac, so there's nothing to lose.

Now on to the details, what are these games like? Here is my summary of what you could call the sales pitch/description:

Governor of Poker 1

Governor of Poker, a poker game like you've never seen before. Discover if you've got what it takes to go up against the Pro players of the old west? Dare to join a tournament or a cash game and perhaps bet 'all in'. How do you think you'll feel if you can totally clean out all the players, take all their money and even their houses, horses and land! Can you rise to the challenge and become the Governor of Poker and lord it over all Texas?

But once you're done with Governor of Poker 1 you won't have had enough! Then it's time for Governor of Poker part 2 where you'll find a ton of extra's!

Governor of Poker 2

This sequel features many changes. Towns and become cities and many new people have arrived. It's all good, but some things cannot be accepted just like that! Lots more cities to conquer and tournaments to play, interactive wallpaper, downloadable theme music, an extra 'Pro' difficulty mode and more.

And the biggest challenge of all awaits. It's the most exciting adventure in the Wild West, fighting the ban on Poker!

In Governor of Poker 2 you can also learn how to play the best poker with the poker-tutorial. There are many new tournaments, multi table with up to 120 competitors spread taking place in 19 cities and 27 poker rooms and casinos. It also includes a bounty hunter game, where you win cash prizes when eliminating an opponent or play against a whole team of players!

Organize your own tournaments, get loans at the bank. You can choose to get to your next games by train, river casino boat or stage coach, naturally you can play poker while travelling.

Buy the hats that suit you best or to get admitted to new locations. Look for opponent tells based on emotions like nervous, on fire, steamy and tilted. Finally defeat the 9 best Notorious players to reclaim your title!

Player feedback - Is Governor of poker worthwhile?

The Governor of poker games reviews I've found have been mixed. Seems Governor of poker games are love it or hate it - so get the free poker games downloads version first and try it and see what camp you're in!

What does seem key is that it is more a game than a real life training sim. If what you are after is a real life poker training system then this is not quite it simply as there are not other people there and your computer is not an AI. For real life practice you still need the sort of [free poker games downloads](#) **practice games** that you can find on sites like NoPayPOKER.com where the play and attitudes are all very real!

However where the governor of poker games can really be of value is help you is to get to grips with the

mechanics of the game and so save some blushes when you go up against real players for the first time.

You'll know then how blinds work, about betting, raising, folding and all that sort of thing. Governor can also be set to a very hard skill level (as well as easy) so maybe it can help you get ready to go up against some hardcore players!

But if what you want is a fun poker game, one that is also suitable for kids to play then the Governor of poker series is one you should look at. Go get the Governor poker games free download for pc or Mac today.
