How I Became Rich By Playing Online Poker

Few years ago I was struggling to run my family and pay the mortgages. Me and my wife both were working full time and still we were not generating enough to have an average life. We were struggling to eat proper food and pay the bills. One day we were just mocking about Facebook playing free poker. I am normally pretty good in poker so my wife had an idea. She told me to join online [poker room](#).

At first I was like no we are already struggling and I dont want to spend the money in gambling. Then after few days she came back to me and said why dont you just play with £20 and see it how it goes, its not a big amount. I said ok fine I will give it a go. So I signed up to a [party poker](#) website on the net. I joined the site with £20 and started playing after reading the terms and conditions carefully. I played for few hours and I saw my winnings was upto £100 so I stopped for the day. I slept on it without telling my wife bcause I know she would be like play some more. You should never be addicted to gambling and I dont want to be doing this everyday.

I used that £100 to pay for the bill for that month and then we were struggling again. Then after few weeks I found a [full tilt Rakeback](#) £30 voucher in one of my old magazine. So I thought why not I use this as it is free money. I started playing again and I played for few hours over the weekend for next few weeks and got my winnings to £300. I saved £200 and spent £100 to pay for the electricity and gas bills and all of a sudden we had some money spare. Then I kept playing for few hours every weekend and after few months my winnings was upto £3000.

I wasnt addictive to it I was making sure that I do not go over board with gambling and after 18 months of poker, I am a professional online poker player and my earning has gone upto £50,000. Our life has changed.
