Ideal Vacation

Most people go on holiday every year to enjoy different culture or just to relax their mind. More than 20% of UK population go on holiday each year but this is just an approximate value. Different people go on different holidays. Some enjoy going on [luxury cruises](#) holidays and some are looking for holidays within their budget, doesn't matter where they go they just want to enjoy themselves.

What is your ideal vacation?

Many people from UK go to another European country for a heavy weekend away or for a few days. What I mean by heavy weekend is that weekend full of alcohol, sun and dancing. That is all and nothing else. They like to go to hot places because there is hardly any sunshine in the UK. Places like Ibiza, Athens, Barcelona, Mallorca and Istanbul are filled with British tourists. But some people like to go on a cruise to Bahamas and the Caribbean islands.

To be honest choosing a holiday does matter when it comes to age. It has been said that young people like going to places where they can enjoy fabulous night outs, nice beach and other outdoor activities. Whereas people with family like to go for a different reason because they have children who want to go to Disney land. Disney land is a great example where both parents and children can have a fantastic time, I have been there myself and I can say it was a great experience for my family.

When I was young even I wanted to go on holidays with my friends more than my family to places where I can drink the night away with no responsibilities. I am 42 now with three children so to be honest I would rather choose a holiday where I can get some relaxation time with a peaceful environment but also a place where my children can have a stunning time but not Disney land again I don't think I can handle the rides anymore. We have been on [MSC cruises](#) and [Windstar cruises](#) in the past and the experience was great, had a lot of fun.
