# Looking for an Action Sports Website?

Are you a company that targets action sports and are looking for graphic design? There are so many expenses involved with running a business, and especially in this economy it is not uncommon for business owners to create websites without a custom design, or even not have a website all together. So why is a graphic designer essential for your business? A few reasons actually:

### 1) Paying for a professional design shows that you are professional

I would suggest looking at graphic design for your company as an investment. Paying for a design created by a professional that specializes in action sports helps you show the world that your business IS professional. Creating a unique presence is more important than ever, and a competent graphic designer can certainly help you accomplish this.

Take a moment and think about some of the memorable graphical representations of the business world today. The "apple" representing Apple, the Nike "swoosh", both of these symbols are very memorable.

### 2) Do not let your potential clients down!

Nothing is worse than a potential client coming to your website to learn more about your business, and leaving disappointed. Having a website is about so much more than just having some basic information about what you do. It is a chance to really awe and convince your potential customers why they absolutely need you.

I understand that the new business owner is going to try and pinch pennies wherever possible, but I suggest that you do not skimp when it comes to going with graphic design. I would view hiring a competent graphic designer as an investment, rather than a payment. This work will go a long way in establishing the credibility of your business and image, one that will help make that all important first impression a selling one.

### 3) Initially establishing your look

You need to have a unique look, you need to be memorable, and that just isn't going to happen if you use the same old template everyone else does. This is especially relevant in the action sports industry.

To find the right designer for you, I would suggest taking some time looking at a few graphic design artists, paying special attention to if they have worked with action sports in the past. After all, if their past work does not look professional, this is not a good reflection of the type of work that they will be able to do for you!

2 one 5 is an action sports design firm located in Philadelphia, PA. You can learn more about this exciting company and how they can help you at their official website:
