# **Lottery Software - How To Win The Lottery - How To Win Lotto System**

Well, I hope so... because I don't make them lightly. In fact, I am putting my money where my mouth is... with \$100.00 of cold hard cash into your bank account if you don't win.

Easy! I know my system is going to produce results for you based on cold hard math.... no wishful thinking, luck, or theory. Just reality.

If you really want to win the jackpot... this is the most important letter you will ever read. Period. So, chain yourself to your seat, cut off all distractions, and listen to every word right now....

Every Sunday... my grandmother and I would head to the store... and imagine what we'd buy with our winnings...

The dream cars... the mansion... the new clothes... the travel... anything, and everything you can imagine...

Long story short... I began buying up every course, system, and software on how to win the lotto I could find.

That is, until one day I saw an ad in the newspaper from world-famous lotto expert by the name of James Gray-Brown...

This guy had a mile long track-record of eye-popping success rates for both himself and his students.

... and my parents were busy enough putting food on the table -- anything extra was out of the question.

He put it like this, "The secret to winning isn't to focus on the jackpot... the real key is to win the small prizes first."

It's the the total opposite of every other bogus no-win system out there... which promises you the moon... only to drain you dry...

And... yes... I am especially calling-out those faux "hot number" systems with odds that are more fantasy than fact.

And... yeah... he had throngs of them... even had his own "groupies" (granted, they were in the "upper" age bracket).

Using his most powerful secret I went on to perfect a system and companion software to make it dead easy...

I call it WinLottoSystems (I call it WLS)... a dead easy way to fuel a never-ending flow of incoming wins.

From: "Mlaml" Monday, August 16, 2010 10:13 PM To: "winlottosystems" Subject: Prize winnings

...on the 11th of August I won 3 REAL five number prizes, 3 four number prizes & six,3 number prizes. All these together = \$23,910.00. This is the largest I have ever won. Thank you for the guidance.

-- Original Message -- From: "Roger" Friday, 17 October 2008 12:33 PM To: "winlottosystems" Subject: winlottosystems Enquiry "...I picked up \$763 the other day followed by \$123 and then \$72 all in three weeks so that is pleasing..."

I began to buy tickets each week NOT just for WinLottoSystems, but those that 95% of lotto players use...

Well, after almost 600 real lottery draws, WinLottoSystems has demonstrated to win lotto prizes up to 10 times more often than 95% of lotto players, and recoup up to 50% in long-term playing costs too...

In fact, below you can view actual winning receipts from a 16 week period where I recouped 92% of my weekly lotto spend...

We're talking thousands of dollars in just a very short time... for more chances... more motivation... and more...
