# MacGregor M85T Driver Review

When you think of sports, MacGregor is a top brand that comes to the top of your own mind. On this [golf clubs review](#) site.

There is a lot of cool new technologies behind this club and and this will help separate it from the other pack.

This club is a real mix of the traditional person born clubs with some top quality, boost your game technology sprinkled top most. The look is ver modern and sleek, with the dark finish which cuts down glare and looks impressive! Macgregor's new cup face 360 technology offers some hot and responsive power along the entire face of your club. What does this look like for you? I'll tell you what...higher ball speeds and much more distance. The club was made with a low center of gravity as well as a face fit adjustable hosel technologies. This can actually shape your drives, depending on your own choosing!

If you love golf and are seeking a new club, the macgregor has a wonderful pricepoint for a club that has brand spanking new technologies. You can now be the really advanced player on the course that every other golfers will envy and just ask you... just what exactly happened? So what do other players say concerning this club?

"All i can say is that the best driver i've ever endured. Having the features to close or open your head is nice, we have mine closed. i helpful to have a taylor designed 580XD, but i struck this probably 20-30 yards farther, and much straighter. I have the stiff shaff and it seems like it has more contract than most stiff shafts. i'm considering buying just as a back up. So impressed i also bought your Pro forged C irons along with love those also. MacGregor appears to be coming back at a good price! "

There you might have it. Take a close have a look at [MacGregor M85T Driver review](#) And in case you don't like it, be sure to check out Our ping series also.
