# **Roulette Is Best Played With A System**

If you are going to play a casino game like roulette you need some kind of a system or a method behind you. If you just place random bets all over the table this will be no good at all, you always need to plan ahead to be successful.

A method could be anything, even something as simple as betting on your lucky numbers. Although this is something that not many people do; most people use some kind of a maths based system.

The Martingale is one of the very popular [roulette systems](#) to be used, however you need to be very wary of this one. Red or black bets are what it is used on, to begin with you use small bets like
