If like me, you want to be able to predict where the ball on a roulette wheel will land, then I have some very bad news for you.

Whilst I am no expert when it comes to probability, I know quite a lot about playing online roulette and all will become clear if you choose to have Roulette Psychic keep an eye on everything for you.

You see a few years ago, the internet gave me some hope that I could win at roulette consistently using a commonly known system called "Martingale" roulette. This is where you keep betting on Red or Black and double up your bets whenever you lose. It made sense it would succeed and it carried on to give me great results on a regular basis.

The idea seemed great to me at the time, I was in my second year of University in Germany, and the prospect of winning at roulette (by using what seemed to be a flawless system) meant that I would be able to finish my studies without struggling for money every day.

However, my dreams were dashed when I lost every penny I invested on these systems at the online casinos. In the end I put myself in debt, and I was forced to drop out of university. I had to find work as an office assistant in my home town of Frankfurt.

After 3 months of working in a job that I never wanted, it all got too much for me and I started to slip in to a pretty bad state of depression. I felt trapped by my debts, and my dreams of having a career seemed like a lifetime away.

But then my life did a u-turn after my work announced that for our Christmas Party they we're going to treat all the staff in my office to a night at a casino and we each had 200 chips to use on whatever we wanted.

Whilst you may be reading this, and sensing some irony here, I was about to make a discovery that would totally change my life, and mould me into the person that I am today.

When we arrived in the casino lobby, I went straight to the roulette table with two of my colleagues, and I simply watched them play for over an hour, spreading their bets around the roulette table. However I noticed that no one on the table was ever betting on the outside bets.

I decided that the confusion of the live table was too much for me, so I decided to sit at a roulette machine instead, and I start placing only outside bets.

Then I started to notice a pattern.....a pattern that I would later go on to code in to the internets cheapest yet most cost effective Roulette Calculator....

Roulette Psychic V2 is the result of 3 years hard work studying casino algorithms which gives the illusion of predicting what area the ball will land on an online...
