Want A driver that can provide amazing distance? Well, look no further because at my [titleist 910 D3 driver review](#) , I cover the most impressive golf clubs of the century.

In this [golf clubs review](#), we go in the technical specifications that get this driver hum. This is why Titleist is a king relating to making drivers.

Let's get right down into it. The 910 D3 Driver is ready to give you long distance with the extremely advanced head design having a responsive, fast face insert of which creates a "sweet spot" that is certainly 10% larger than different drivers. It also boasts a patented, innovative, Sure Fit Tour dual-angle hosel which supplies precise and independent studio and lie adjustments to make sure you fine tune ball airline. This gives you terrific ball accuracy and influence.

When you add high performance weighting and a sloped, ultra-thin overhead design and on-axis raise weight screw, you get a small increase in stability and an occasional, deep center of gravity allowing you for medium/high launch by using medium/low spin.

The entire club is solid titanium having a nice velvet 360 silicone grip.

Let's here exactly what a fellow golf pro must say about this clb:

"I have owned Titleist drivers in the past (904, 905R) and seriously enjoyed them. In looking for that ONE perfect launch, i have tried Ping, TaylorMade, Bridgestone (best from the rest) and a number of others with limited success. due to not using as frequently as in the past, my driver has already been slightly off and that i couldnt find the fairway many times, especially in competition the past several years.. By miscalculation, i came upon an important Titleist fitting event within my home club. I put the Titleist D3 at my hands with the Diamana Pink and liked it.. Website switched to the TEAR shaft and my country changed immediately. My swing speed is around 100-103 and therefore shaft is magic in my opinion. Sooooo straight and effortless I will be ecstatic. I may contain added some distance and yet i dont care, i'll find the fairway Much easier and often now, my confidence grows on every occasion out.. When you add in the opportunity to easily tweak the studio and lie this clb becomes a superstar.. Really worth the money (and i seldom say that). I like it so much i decided the 3rd day and even bought the 3 timber.. I feel like im within the perfect place now to your next several years.. Merely beautiful Titleist, well achieved! "

Either way, you'll be a winner with one of these top notch drivers!
