# What Is Freestyle Snowboarding?

Snowboarding is definitely an individual sports that involves descending in a slope that is entirely covered with snow using a board which is attached to the feet from the riders. This sport was created and was inspired through similar sport like sledding, skateboarding, skiing and surfing. This came as early as 60's and 70's and was popularly known it became a [Winter Olympic Sport](#) by 1998.

Today it is a popular [style of snowboarding](#) that is used by most enthusiasts because it involves tricks and excitement of the sports. You can jump, rail slides, switch using, halfpipes and do all other methods when you do the freestyle snowboarding. The difference of Freestyle snowboarding with Freeriding is that the techniques used are mostly airborne, meaning more on flips, re-writes and grabs etc.)

There are more tricks also that are feasible on the ground like grinding, ground spinning and bonking. All these methods must be done with care with precision or you will find yourself collapsing down and out of balance. The freestyle snowboarders generally use shorter, softer snowboards and boots. This is to reduce the weight of the board to learn effectively to maneuver on air along with snowboard at hand.

Competition on snowboarding events is not complete without the freestyle competition. You will notice therefore that ski resorts are making it sure they maintain a terrain parks with handrails, half pipes, fun boxes of different designs and machine-formed jumps all with regard to enthusiasts. In the freestyle competition, designs that are included in the contest tend to be: quarterpipe, halfpipe, big air and slopestyle.

Take note that a snowboard is designed for an objective. It should not be used other than what it's intended for. It will not perform it's best when the terrain is not what it is made for. For an excellent performance, snowboards have something to do with it also. It must be short, a bit fat, lighter and very simple to maneuver. Be sure the tips associated with both the tail and the tip are identical in shape called twin tips.

Since snowboarding sports activities includes dangerous stance, warnings should be practice at all times. The actual tricks must be done with treatment, making sure the trip down is as easy as the journey up. Snowboarding offers an greatest thrill by doing the moves the right way, extra careful in the landing. Only those who're excellent in freestyle snowboarding can participate in the said tournament to prevent further accidents that could be fatal to anyone.
